

Disinfection Service

Precautionary Disinfection Service (For **Non-Covid** Confirmed Premise)

Reduce Cross Contamination Risks Through Precautionary Disinfection Service

Cleaning alone does not create a completely hygienic environment. Surfaces may appear clean but can still be contaminated by microorganisms commonly found in the environment.

You can protect your family by reducing disease causing organisms with Precautionary Disinfection Service. Treatment begins with surface disinfection spraying followed by space misting delivering the solutions to hard-to-reach areas.

Fast and Effective

Surface and space sanitation treatment that targets pathogens instantly upon contact

Safety Assured

Safe to be applied at home. The low toxicity, water-based and alcohol-free formula leaves no trace

Strict Compliance

Rentokil Disinfection Service is developed as per Ministry of Health (MOH) guidelines
